# Our Futures <br> Pride Survey 2013 

Report to the Leadership August, 2013

## Pride Survey - What is it?

- Nationally recognized survey
- 128 items plus 10 additional local questions. Given to all students in grades 6, 8, 10, and 12
- Results available on the Our Futures website
- District results given to each district directly. We only have county-wide results
- Agreed-upon tool for assessment by all Licking County agencies.

## Pride Survey - Who Participates?

| onward | 11 Districts: All public school districts in Licking <br> County, plus C-TEC. <br> Except that Licking Valley did not participate in <br> 2013 and starting this year we will administer <br> the test every two years so they will join us <br> again in 2015. |

## Pride Survey - Key Findings

1. 5,639 Students were surveyed this year. (5,768 last year)
2. Alcohol and tobacco are still the most commonly used substances
3. Alcohol is highest in use, then tobacco, and then marijuana.
4. Tobacco use continues to decline at grades 10 and 12; and, despite some upward growth at grades 6 and 8 , the trend lines for the combined average continues to go down.
5. Alcohol use is up this year at all 4 grade levels. Despite this, the trend line for the combined average is still downward.
6. A comparison with last year's National Survey shows us to be as much as $5 \%$ above the national norm for alcohol and tobacco at $12^{\text {th }}$ grade. Marijuana use is above the norm at all four grades tested.
7. Student perception of risk for alcohol and marijuana declines as grade levels increase except for the perceived risk of tobacco use which stays high.
8. There is a concerning drop in the perception of risk for marijuana.
9. Kids are using at other places - not at school. And they're using tobacco but not alcohol in the car.
10. Over $60 \%$ of our students are not using anything at all grade levels since 2009.
11. Protective factors such as church attendance, good grades, participation in community and school activities show a relationship to non-use.
