

# Care Gram

## High-fiber Diet

Fiber promotes regular bowel movements and increases stool size. A high-fiber diet helps promote intestinal health and prevent digestive disease. In addition, a diet high in fiber can prevent heart disease, help control blood sugar levels, and maintain a healthy weight.

Fiber is only found in plant-based foods such as fruits, vegetables, nuts, seeds, legumes, and whole grains.

The recommended daily amount of fiber is 25 grams for women and 38 grams for men.

Tips when adding fiber to the diet:

- Adding fiber to the diet should be done slowly – adding fiber to your diet too quickly may cause gas, cramping, bloating, or diarrhea.
- Certain high-fiber foods are better tolerated than others – eat high-fiber foods that your body can tolerate.
- Drink at least 8-10 cups of fluids every day to help keep stools soft, unless otherwise recommended by your physician or dietitian.

| Food Groups  | Sources of High Fiber Foods  | Tips   |
|--|--|--|
| <p><b>Bread, Cereals, Rice, and Pasta</b><br/> <b>6-8 servings per day</b></p> <p>Serving size = 1 slice bread,<br/>           1 cup ready-to-eat cereal, ½ cup<br/>           cooked cereal, rice, or pasta,<br/>           ½ bun, bagel, or English muffin</p> | <ul style="list-style-type: none"> <li>• Whole-wheat or cracked-wheat breads, muffins, bagels, or pita</li> <li>• Bran cereals</li> <li>• Rye bread</li> <li>• Oatmeal or oat bran</li> <li>• Whole-wheat pasta</li> <li>• Whole-wheat crackers or crisps</li> <li>• Brown or wild rice</li> </ul> | <p>Look for breads and cereals with at least 3 grams of fiber per serving.</p>   |
| <p><b>Vegetables</b><br/> <b>2-3 cups per day</b></p> <p>1 cup = 2 cups raw leafy greens,<br/>           1 cup raw, cooked or chopped,<br/>           1 cup 100% vegetable juice</p>   | <p>All raw, cooked, or canned vegetables</p>   | <p>Eat the peel on vegetables because it contains fiber. Eat raw vegetables due to higher fiber content than cooked, canned, or juiced vegetables.</p> |
